B70M-P36R Hydraulic Accumulator Pump – 700 bar, high-visibility yellow (IP44M)

Item number:	B70M-P36R
Packing unit:	1

The B70M-P36R hydraulic battery-powered pump is fitted with a 36 V – 8.0 Ah battery and operates at a working pressure of 700 bar. The pump can be operated using a hand-held or foot-pedal remote control. It is fitted with a manual button for operation and pressure relief (electronically locked for safety reasons when the hand-held remote control is in use). On a single battery charge, for example, up to 90 NAE-KEBY 3 x 150 mm cuts can be made.

The hydraulic pump is deliberately coloured yellow to ensure optimum visibility of the unit and better recognition by the operator. Particularly in demanding and safety-critical applications, such as in the railway sector, the striking colour scheme helps to improve visibility and enhance safety at the worksite.

The unit complies with protection class IP44M and is therefore also suitable for demanding operating environments.

TECHNICAL CHARACTERISTICS

Maximum operating pressure [bar]:	700
Battery voltage [V]:	36
Battery capacity [Ah]:	8.0
Battery type:	Li-Ion
LxHxW [mm]:	405 × 335 × 161
Weight [kg]:	10.0 (tool)
Manufacturer:	Cembre Group

SCOPE OF DELIVERY

- Pump
- 3 m hydraulic high-pressure hydraulic hose
- Remote control unit
- Battery charger
- Canvas bag for accessories
- Operating batteries 36V - 8.0 Ah
