

Wire stripping device CS-60

Stranded wire 0.08 - 6 mm²

Item number:	CS-60
Product weight (kg):	8.9 kg
Packing unit:	1

The electrically operated CS-60 stripping machine is compact and easy to use. The clear graphic display shows the values entered. In just a few seconds, the settings of the cross-section and the stripping length are done, making the device ideal for small series. A short insertion length and the clearly visible working area support fast and fatigue-free working. The clamping force is set to the required automatic stripping force. This prevents pressure points on sensitive insulations. The carrying handle makes the CS-60 mobile.

TECHNICAL CHARACTERISTICS

Cross-section range:	0.08 - 6 mm ² / AWG 32-10
Cycle time (s):	0.3
Insertion length (mm):	15 + X
Partial withdrawal length (mm):	2 - 20mm
Weight (kg):	9.5
Stripping blades:	V-shape
Stripping length (mm):	3

TECHNICAL CHARACTERISTICS

Stripping length max. (mm):	20
Max. diameter (mm):	6
Power supply:	230V/50HZ (115V/60HZ)
LxHxW (mm):	363 x 221 x 141
