

Print ribbon premium, black

For Rolly heat shrink tubing

Item number: GM-844121
 Packing unit: 1

MG-TRPR-060 Premium is a high-quality thermal transfer ribbon for durable and professional marking with CEMBRE MG printing systems. It has been specifically developed for industrial use and ensures consistently high print quality even in demanding applications.

Thanks to its premium composition, MG-TRPR-060 Premium offers very high abrasion resistance as well as excellent durability against mechanical stress and environmental influences. The printed results feature high opacity, precise edge definition, and long-term readability.

MG-TRPR-060 Premium is ideally suited for industrial, plant, and control cabinet identification, as well as for all applications where the highest requirements for quality, durability, and reliability are demanded. It is the optimal choice for professional users who rely on long-lasting and compliant markings.
