

# Print ribbon premium, black

Item number: GM-991613  
 Packing unit: 1

MG-ETPR Premium is a high-quality thermal transfer ribbon designed for durable and professional marking with CEMBRE MG printing systems. It has been specifically developed for industrial applications and ensures consistently high print quality even under demanding conditions. Thanks to its premium formulation, MG-ETPR Premium offers very high abrasion resistance as well as excellent durability against mechanical stress and environmental influences. Printed markings feature high opacity, sharp edges and long-term legibility. MG-ETPR Premium is ideally suited for industrial, machine and control cabinet marking where the highest requirements for quality, durability and reliability are essential. It is the optimal choice for professional users who demand long-lasting and compliant markings.
