

# Ergonomic table stand for holding roll material.

Item number:	GM-DSPB-TCS
Product weight (kg):	1.4 kg
Packing unit:	1

The CEMBRE **DSPB-TCS** is a robust and ergonomic table stand designed to hold roll media and accessories for CEMBRE thermal transfer printers. It has been specifically developed for professional use in workshop and production environments, ensuring an orderly, stable and reliable material feed. Thanks to its solid aluminium construction, the DSPB-TCS provides a secure stand even when handling larger or heavier rolls and supports a smooth and consistent material flow. This significantly simplifies roll handling and contributes to an efficient and interference-free printing process.

The DSPB-TCS is the ideal addition to desktop printers and is particularly recommended when roll material needs to be fed outside the printer housing, for example when using larger roll diameters or special applications. Its compact design allows easy integration into existing workstations, improving ergonomics and process reliability in industrial marking applications.

## TECHNICAL CHARACTERISTICS

Suitable for:	CEMBRE Rolly3000 thermal transfer printer
Material:	Aluminium
Weight (kg):	1.4
LxHxW (mm):	310 x 283 x 256
