

CEMBRE ROLLY3000-CUT – Cutting module

Labels Rolly3000

Item number:	GM-ROLLY3000-CUT
Packing unit:	1

The **ROLLY3000-CUT** is mounted on the front of the printer and is used for the automatic cutting of marking material immediately after printing. It is designed for use with TTL labels as well as continuous roll labels and significantly increases efficiency in serial marking applications. The cutting module is fully controlled by the print job and operates without any manual intervention. ROLLY3000-CUT is an accessory module and not a standalone device.
