

CEMBRE ROLLY3000TR-CUT – Cutting module

Shrink sleeves Rolly3000

Item number:	GM-ROLLY3000TR-CUT
Packing unit:	1

The **ROLLY3000TR-CUT** is mounted on the front of the printer and enables automatic cutting or perforating of continuous material without any manual intervention. It is suitable for TTL labels, flexible TTF thermal transfer films, as well as heat-shrink tubing on rolls (TERMO-ROLL). The cutting unit is fully controlled by the print job and supports an efficient and reproducible serial production of cable and wire markings. ROLLY3000TR-CUT is not a standalone device, but an accessory module for compatible CEMBRE printers.

TECHNICAL CHARACTERISTICS
