

# Through connector CU, 10mm<sup>2</sup>

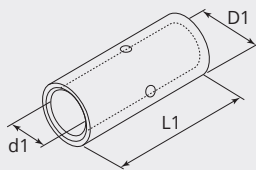

with central stop, Type HSV

|                                                                                                                                                                    |        |                                                                                     |
|--------------------------------------------------------------------------------------------------------------------------------------------------------------------|--------|-------------------------------------------------------------------------------------|
| Item number:                                                                                                                                                       | HSV-10 |  |
| Packing unit:                                                                                                                                                      | 100    |                                                                                     |
|   |        |                                                                                     |

## TECHNICAL CHARACTERISTICS

|                                  |                        |
|----------------------------------|------------------------|
| Material:                        | ETP copper (CW008A)    |
| Surface:                         | Eletrolytically tinned |
| Wire section (mm <sup>2</sup> ): | 10                     |
| Central stop:                    | Yes                    |
| Manufacturer:                    | Cembre Group           |

## DIMENSIONS

## DIMENSIONS

|          |      |
|----------|------|
| L1 (mm): | 30.0 |
| d1 (Ø):  | 4.5  |
| D1 (Ø):  | 7    |

## NOTE

- Each through connector is marked as follows: Company logo and cross-section (mm²)
