

# Automatic trimming device LC-100

Type LC

Item number:	LC-100
Product weight (kg):	9.3 kg
Packing unit:	1

Cutting cables to length with the LC-100 offers considerable savings potential. The front flap is simply opened by pressing a button. After inserting the cable, the measuring and transport rollers are automatically adjusted to the diameter when closing the flap. Enter the desired length and quantity on the control panel and start production. The supplied software enables the pre-planning of standard devices and switching cabinets on the PC. Recurring cutting jobs can be saved as projects on the LC-100. For cutting tube up to  $\varnothing$  8 mm, we recommend the tube cutter LC-100SL2. Its special tube guides ensure straight cut surfaces.

## TECHNICAL CHARACTERISTICS

<b>Cross-section range:</b>	0.08 – 10 mm <sup>2</sup> / 28-8 AWG
<b>Feed rate:</b>	max. 0,5 m/s
<b>Weight (kg):</b>	11.0
<b>Max. measuring length:</b>	99999 mm / 999.9 Inch
<b>Measurement units:</b>	mm - Inch
<b>Power supply:</b>	230V/50HZ (115V/60HZ)
<b>Language selection:</b>	D, GB, F, I, E
<b>LxHxW (mm):</b>	194 x 295 x 227
