

Automatic trimming device LC-160

Type LC

Item number:	LC-160
Packing unit:	1

If you want to optimise your production in the long term and gain more flexibility in wire processing, then the LC 160 is the ideal choice. This powerful model significantly expands the range of applications and enables the processing of flexible and rigid conductors up to 16 mm² cross-section as well as heat-shrink tubing - a performance level that is unrivalled in this device class.

TECHNICAL CHARACTERISTICS

Cross-section range:	0.08 – 16 mm ² / 28-6 AWG
Feed rate:	max. 0,5 m/s
Weight:	10.0
Max. measuring length:	1000 m
Measurement units:	mm - Inch
Power supply:	230V/50HZ (115V/60HZ)
Language selection:	D, GB, F, I, E
LxHxW:	301 x 194 x 228
