

# Spiral drill PE240AR

For steel rails with tensile strength up to max. 1100N/mm<sup>2</sup>

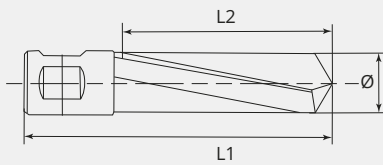

|                      |           |                                                                                     |
|----------------------|-----------|-------------------------------------------------------------------------------------|
| Item number:         | PE240AR   |  |
| Product weight (kg): | 0.1414 kg |                                                                                     |
| Packing unit:        | 1         |                                                                                     |

To use with adapter: DPE (adapter not included)

## TECHNICAL CHARACTERISTICS

|                     |               |
|---------------------|---------------|
| Length (mm):        | 85            |
| Diameter (mm):      | 24            |
| Cutting depth (mm): | 55            |
| Manufacturer:       | Cembre S.p.A. |

## DIMENSIONS

## DIMENSIONS
