

# Catenary mounting arm SA-RDS-H

for cuts in manual mode on the H-beam

Item number:	SA-RDS-H	
Packing unit:	1	

- The special design of the clamp automatically ensures an optimum horizontal and secure connection to the H-beam.
- Mounting arm with two joints enables the user to work easily and precisely.
- Easy handling when folding the cut-off machine without removing it from the H-beam and continuing the cut on the opposite side of the beam.
- Mounting arm joints equipped with high-precision bearings to prevent lateral forces and prevent misalignment when cutting on both sides.
- H-beam up to max. 280mm

## TECHNICAL CHARACTERISTICS

Weight (kg):	8.5 kg
Max. diameter (mm):	280.00
Cutting disc diameter (mm):	max. 356.00
Manufacturer:	Otto Schoch AG
