

# Torque wrench isolated VDE-DMS12-100

Type VDE, adjustable, ratched head, 20 - 100Nm

Item number: VDE-DMS12-100

Product weight (kg): 1.2 kg

Packing unit: 1

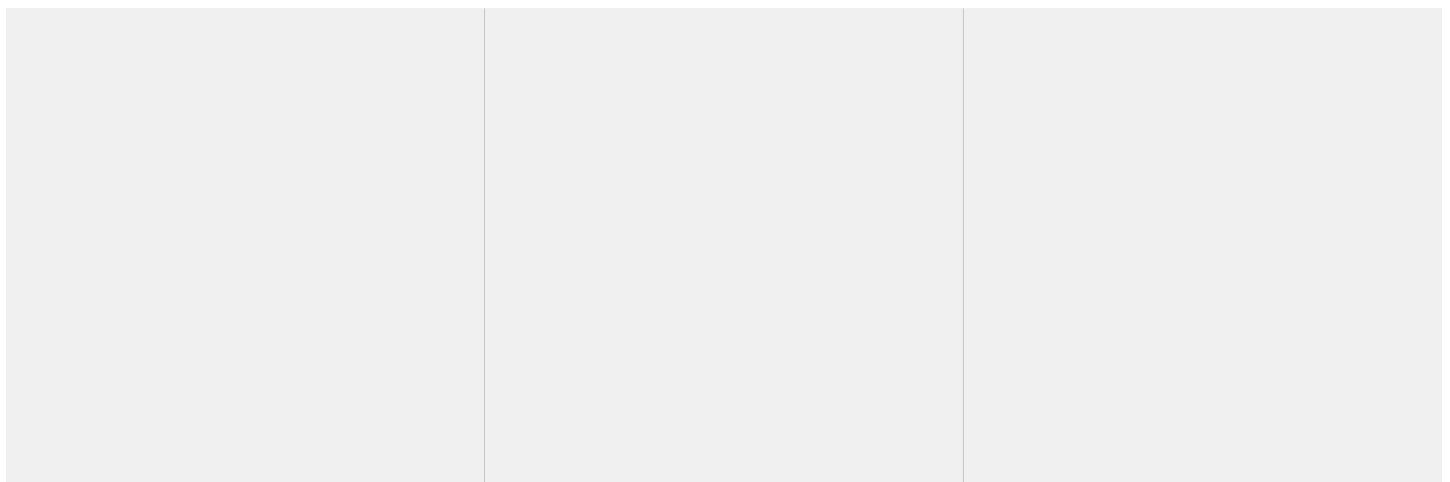

- 1000 volt isolated, according to EN/IEC 60900
- For bi-directional use
- With security certificate

## TECHNICAL CHARACTERISTICS

|                  |                                       |
|------------------|---------------------------------------|
| Drive:           | ½                                     |
| Display:         | Scale                                 |
| Version:         | Adjustable                            |
| Torque (Nm):     | 20 - 100                              |
| Direction:       | Bi-directional                        |
| Accuracy:        | +/- 4                                 |
| Handle material: | Multi-layer insulation - yellow / red |
| Length (mm):     | 465                                   |
| Graduation (Nm): | 5.0                                   |
| Manufacturer:    | Tohnichi                              |
